 Tehran

ABOUT ME

I approach product work with a problem-first, outcome-driven mindset, believing that great products begin with a **deep understanding of users** rather than assumptions. I enjoy combining user research, product data, and cross-functional collaboration to uncover root causes, validate opportunities, and make **informed product decisions**. My passion lies in product discovery and building experiences that create lasting value for both users and the business.

EXPERIENCES

- Assistant Product manager

Ebcom

<https://ewano.app/>

Nov 2025 - Sep 2026

Contributed to a fintech product, developing a strong understanding of regulatory requirements, user behavior, and business constraints. Conducted user interviews, usability testing, and product research to validate assumptions, **uncover user pain points**, and identify root causes. This experience strengthened my product discovery mindset and shaped a user-centric, evidence-based approach to building products that **balance** user needs with business goals.

 - Led the **launch and optimization** of the Evano Store, contributing to a **10% increase in sales** by improving merchants accessibility.
 - Conducted user interviews and usability testing on the payment flow, leading to a case study and redesigned experience projected to increase conversation by 10%.
 - Improved **search result performance** by implementing a mapping-based search structure, **contributing to an 50% improvement**.
 - Introduced and scaled** the Nearby Merchants feature, resulting in a **4% increase** in in-person transactions.
 - Improved** merchant location and branch **data accuracy**, reducing user confusion and **addressing 3% of customer support** inquiries.
- Seo & Product optimization specialist

Marketing agency

<https://www.mahoonia.com>

Sep 2024 - Sep 2025

Worked at a marketing agency managing SEO for diverse businesses, focusing on competitor analysis, keyword research, and data-driven content optimization. Improved **website visibility** through on-page and technical SEO, contributing to **ranking multiple websites on Google's first page** within 4–6 months and increasing organic traffic and user engagement while identifying optimization opportunities.

 - Increased organic traffic** by **30%–40%** within 4 months through **data-driven content optimization** and SEO strategy execution.
 - Improved rankings of primary keywords from page 3 to page 1, resulting in higher visibility and qualified traffic.
 - Boosted average CTR** from **15% to 20%** by optimizing page content based on data from Search Console and Google Analytics.
 - Identified and resolved technical SEO issues, improving crawlability, indexing, and overall site health.
 - Strengthened **website authority** by optimizing internal linking structures and executing off-page SEO strategies.
